

## JPGtoPNG project report:

### 1.1 Purpose:

The purpose of this project is to explore python's image processing powers and create an efficient image format converter.

### 1.2 Testing:

Running the following command to convert 4 images from JPG to PNG.

```
(venv) mohamedbasuony@Basuonys-MacBook-Pro Converter % python3 JPGtoPNG.py Pokedex/ new/
```

After converting every image, the program outputs the image name and the message "ALL DONE!".

```
4.4 pikachu.jpg  
ALL DONE!  
4.2 bulbasaur.jpg  
ALL DONE!  
4.5 squirtle.jpg  
ALL DONE!  
4.3 charmander.jpg  
ALL DONE!
```

You can now find the new converted images in the folder you chose to save them in.
